

E-INVOICING

TecCom is the N° 1 platform for trading in the independent automotive aftermarket.

Process all your tax-compliant electronic invoices in one platform.

TecCom e-Invoicing automates tax compliant invoice processing for the international independent automotive aftermarket. Stand alone or fully integrated into your ERP system, it can be adopted into any existing system landscape. You can focus on your core business, while using TecCom's simple e-Invoicing solution in a complex environment with changing compliance and technical obligations.

01 Seller issues an electronic invoice. Seller's TecCom e-Invoicing sends a tax-compliant e-invoice.

Seller

- ✓ Send tax compliant electronic invoices to all your customers.
- ✓ Rely on a transparent workflow, ensuring your supply chains run smoothly.
- ✓ Get paid faster while reducing manual work and errors.
- ✓ Reduce your CO₂ emissions with no need for ink or paper.

02 TecCom validates the invoice data. The TecCom platform automatically validates each invoice document, ensuring high quality. Both the seller and the buyer can use automated format conversions, multiple delivery channels and an audit-proof archive.

03 Buyer receives a legal e-invoice. The buyer can automatically process even the highest volumes of tax-compliant invoices.

Buyer

- ✓ Receive tax-compliant, verified electronic invoices from all your suppliers.
- ✓ Rely on high data quality thanks to automated validation and IAM industry standard.
- ✓ Save time and money by reducing manual work and avoiding errors.
- ✓ Use one platform for your international order-to-invoice processes.
